The Noritsu M300 Pro.
The clear choice
for premier quality.

[from the leader in photo imaging]

NORITSU
RELIABLE SOLUTIONS, EVERLASTING MEMORIES

The M300 Pro Advantage

Get high-quality, archive prints and proofs with Noritsu technology

Noritsu's fourth generation technology and 7-color pigment ink system produce vibrant archive quality (1440 x 720 d.p.i.), highly water-resistant, longer-lasting prints. Studies show that prints made with pigment ink outperform dye-sub prints, lasting an average of 73.5 years longer (for unframed displayed prints).*

Wide variety of print sizes

- 5" x 3.5"
- 6" x 4"
- 8" x 4"
- 5" x 7"
- 8" x 10"
- 8" x 12"
- 10" x 8"
- 10" x 12"
- 10" x 36"

Maximizes space

Small 4.5 sq. ft. footprint. Two M300s can be stacked to boost productivity and growth.

High capacity

Produces more prints to provide more revenue opportunities.
- Up to 325 prints/hr (5" x 3.5")
- Up to 265 prints/hr (6" x 4")

Outputs 10" x 8" prints at a blazing 104 prints/hr.

Higher margins and increased revenue

Cost-efficient ink and paper deliver low total cost per print and additional print sizes create new profit opportunities with enlargements, greeting cards and poster prints.

Supports roll paper, sheet paper and higher growth

Meet the needs of customers' multiple orders and increase revenue streams.

World-class service and support

Get peace of mind from professional on-site installation and available service options such as training by a factory-trained Noritsu technician, dedicated support 7 days a week and nationwide on-site field service, along with world-class Noritsu reliability.

Noritsu innovation

For 50 years, Noritsu has advanced photo processing technology with a tradition of innovation that has been recognized with awards from industry experts, including the Digital Imaging Marketing Association, Photo Trade News and Digital Output Magazine.

With the M300, I can provide my customers with the highest quality prints.

Prints 8 different sizes in just 4.5 square feet!

M-300

The Noritsu M300 Pro
gives photography
professionals what no
other small printer can
– the highest quality
archive prints, plus the

M-300

Easy connection and setup
Uses standard 110V power and USB 2.0 interface.
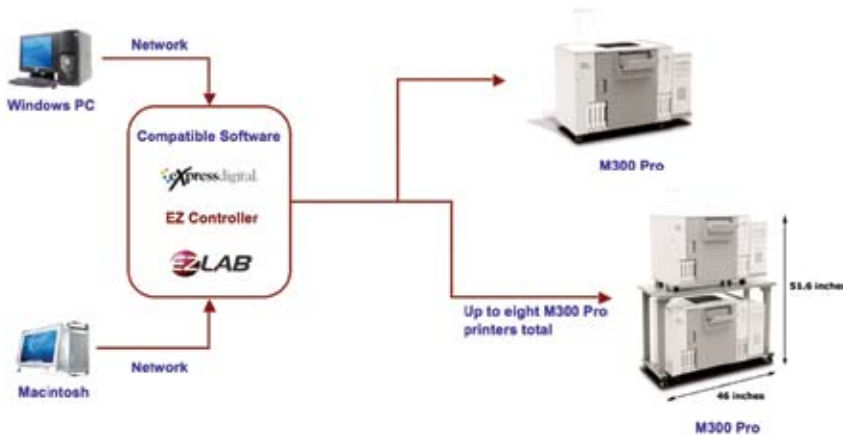

Environmentally friendly
No chemical disposal, no hassle.

Individual color cartridges
The M300's individual color cartridges are cost-efficient to maximize efficiency and produce less waste than printers with multi-ink cartridges.

Optional EZ Controller Software
Easy-to-use GUI lets you smoothly manage incoming orders, make value-added print settings correct images for highly efficient workflow.

The M300 gives me more camera time and extra flexibility with print production.

RELIABLE SOLUTIONS, EVERLASTING MEMORIES

M-300 Specifications
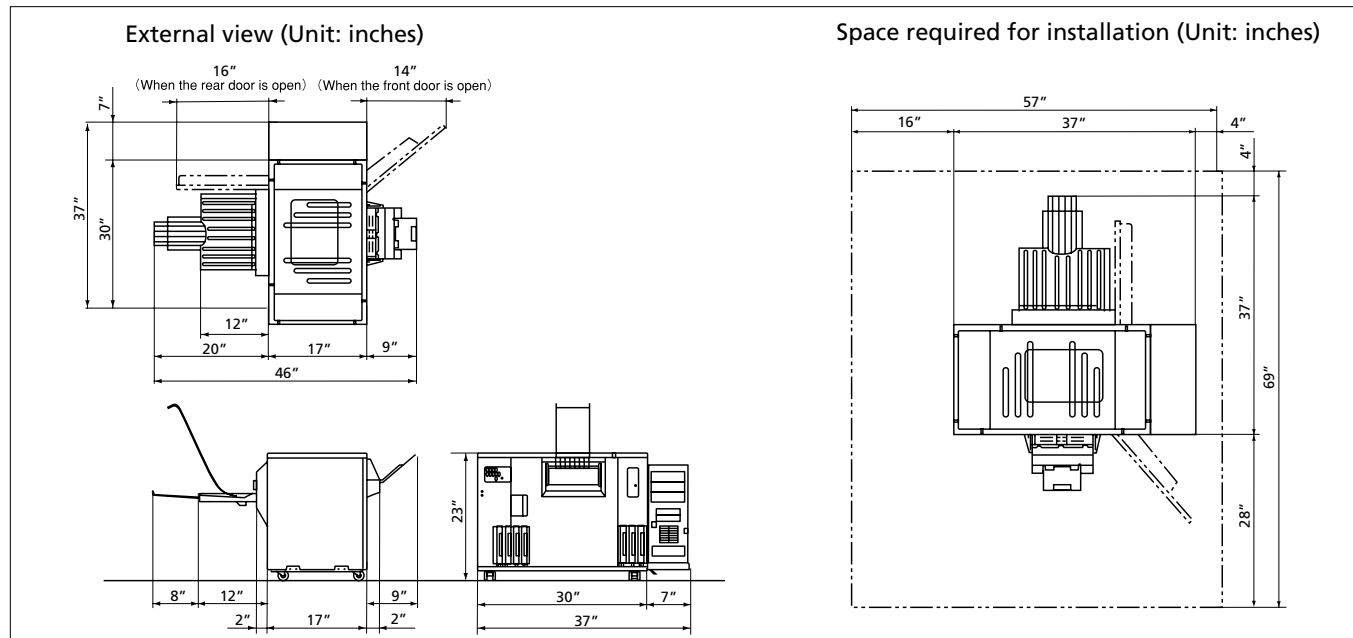

Printing system	Inkjet
Print resolution	1440 x 720 dpi
Paper Sizes	Roll paper: Width: 5", 6", 8" and 10"
	Advance length: 3.5" to 18" (36")*
	Sheet paper: Width: 5" to 8.5"
	Advance length: 8" to 12"
Maximum print size	10" x 36"
Paper specifications	Noritsu inkjet photo paper (semi-glossy/glossy)
	Roll paper length: 328'
	Diameter of paper roll core: 3" (76.5±0.1mm)
	Paper thickness: 266μm
Ink	7 colors of pigment ink: Y (Yellow), M (Magenta), C (Cyan), BK (Black), R (Red), V (Violet), CL (Clear)
	Volume: 500 ml per color
Dimensions	See "external view" below
Weight	Approx. 159 lbs.
Power specifications (1P2W only)	Printer: AC100V - 240V 1P2W 50/60 Hz
	Does not include RIP PC Power Requirements
Rated power capacity	300VA or less

Paper width: 8" and 10" only. Option required.
The maximum paper advance length is 18" when the paper width is 5" or 6".

Stand-alone Printer Repeat Print Capacity

Print size (width x paper advance length)	Roll Paper Processing Capacity (prints/hr)
5" x 3.5"	325
6" x 4"	265
5" x 7"	168
8" x 10"	95
8" x 4"	230
8" x 12"	79
10" x 8"	104
10" x 12"	70
10" x 36"	23

Calculated according to our criteria. The actual capacity you achieve may be different.
